

## "Space Conference Abstract"

In 1980 Dennis M. Hope did form a company named, the Lunar Embassy. The purpose of this company was to offer to the citizens of the planet Earth the opportunity to purchase lands on other planets in our solar system. After twenty-three years of selling properties on other planets and with a compilation of more than 2 million one hundred thousand property owners in 180 countries on planet Earth, Dennis M. Hope has finally started to get recognition for this pioneering company. In June of 2003, Dennis and his company have been recognized by the United States Congressional group, presenting to him and his organization, the Business Advisory Leadership Award. In July of 2003, Dennis received information from the republican congressional committee that he had been nominated to receive, "The Gold Medal," award. This is the highest commendation offered any citizen from the republican congressional committee. Dennis will be presented this "Gold Medal" award at a dinner at the White House in October of 2003. The exact date will be published later this year.

A brief update on the activities of the Lunar Embassy and their newly formed Galactic Government will be presented at this conference.

Dennis M.. Hope  
CEO/ (acting) President - Galactic Government  
AKA: "The Head Cheese"
